

SEAR Final Report

Goals for This Sprint:

Finish formatting of the SRS. Properly label our data dictionary and add our Entity-Relationship Diagram since it was only on paper.

What we completed:

We finished formatting and editing the document. We filled out several more data items for the data dictionary, the table of contents, and the glossary. Finished the ERD and posted it to the report.

Next Iteration goals:

None. Real project goals would be to begin design after presenting our SRS to the client.

Reflection on progress:

We were able to accomplish a lot. The progress from the beginning allowed us to finish the SRS without having to do a lot of work last minute.
