

SEAR Periodic Report

Goals for This Sprint:

We had wanted to complete the entire first section of the SRS document, Most of Section 2, Complete a first iteration of Section 3, First Iteration of section 5, and section 6.

What we completed:

We completed many of our goals however we may need to revise some items if the scope of the project changes. Section 6 did not get started at all. Section 5 did not get as much finished as planned and will need more planning in regards to figuring out how the final program needs to work.

Next Iteration goals:

The goals for the the next iteration are to further define the features section of the project section 3, and start getting into the diagramming some of conceptual models. This will include how data interacts and moves through the program as listed in Section 4 Data requirements.

Reflection on progress:

This week we set a lot of couples which was great because even though we may not be completely finished with each of the sections we started we still were able to get a good first iteration down.

Two Week Sprints	Christopher Blake Matis	Michael Adams	Hour Worked Combined
Time Spent on Proposal 2/26	6 hours	6 hours	12 hours
Second Sprint 3/12	4 hours	6 hours	10 hours
Third Sprint 3/26			
Fourth Sprint 4/9			
Fifth Sprint 4/23			
Sixth Sprint 4/30			
Final Report			
Total Time Spent working	10 hours	12 hours	22 hours
